

DAIDA DESIGN

ABOUT US

Daida Design & Architecture, together with its team adopting a collective production model, acts with the awareness of designing not only a space but also a life and provides services in the fields of architecture & interior architecture.

Daida Design, which has been providing a wide range of services in different scales since its establishment, combines changes in architectural design, innovations offered to contemporary life, sustainability, functionality, art and aesthetics and designs timeless spaces.

In order to ensure the spatial integrity of the buildings, they have been combining different touches with a contemporary vision with a holistic understanding of space and personalized decoration - accessory designs since 2019.

The background is a faded, light-colored photograph of a classical sculpture workshop. In the foreground, two large marble heads with curly hair are shown in profile, facing each other. In the background, several other marble figures are visible, some standing and some seated, in a well-lit studio with wooden beams.
